Seating

COMFORT FROM
THE INSIDE OUT

Comfortable, Cool, and Coordinated

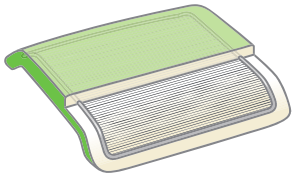
Comfort is experienced not perceived. A typical office chair layered in bulky padding may look comfortable but it also looks well bulky. Technology has helped make everything slimmer, trimmer, and more streamlined – from TVs to mobile phones. Nucleus brings the same sophisticated high tech aesthetic to office seating without sacrificing comfort.

With a coordinating selection of ergonomic work chairs, stackable multi-purpose chairs, and elegant café height stools – all available in a variety of material options, including a choice of fully upholstered or mesh backs for Nucleus work chair – Nucleus brings cool and comfortable together for any area of the workplace.

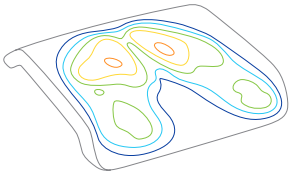
MATERIAL INSPIRATION

Nucleus replaces the thick foam padding standard office chairs use to keep you comfortable at work with an internal seat structure formed by ilira®-stretch NRAM. This advanced suspension material also forms the back of the fully upholstered Nucleus work chair. Mesh back models feature ilira-stretch M4, which flexes four ways to put instant lumbar support right where you need it.

INSIDE THE COMFORT



SEAT CONSTRUCTION
Inside the Nucleus seat, we pull ilira-stretch NRAM material over a frame, then over-mold it with foam. Once upholstered, this ultra-slim seat provides a soft initial cush and lasting, supportive comfort.



NUCLEUS SEAT

PRESSURE MAPPING
When you sit in a Nucleus chair, the seat distributes your weight evenly, minimizing pressure points (red zones) for improved circulation and reduced muscle fatigue.

BACK OPTIONS

The fully upholstered back uses the same unique construction as the Nucleus seat to deliver responsive back support and a clean, refined aesthetic. Mesh back models offer personalized support, breathability, and a more contemporary look.

SIT DOWN AND STAND OUT

Nucleus looks like no other chair because it's made like no other chair. Its cutting-edge materials and innovative construction not only make sitting down a pleasure, they also help Nucleus to stand out. With the open knit and soft hand of its ilira-stretch M4 mesh back, Nucleus looks right at home in today's open plan office layouts. Opt for the fully upholstered work chair for conference rooms, private offices, and other more conservative spaces.

c

FINISH YOUR WAY

You can personalize the look of Nucleus with hundreds of HON textiles and a selection of options for bases, frames, and arms. Nucleus work chairs, multi-purpose chairs, and café height stools are available in three mesh colors. Only the work chair is available fully upholstered.

"If you sit on a chair that's uncomfortable, you're sitting on it. If you sit in a chair that's comfortable, you're sitting in it. With Nucleus, you're definitely sitting in your chair."

Marcus Koepke,
Designer of Nucleus

Front: Nucleus work chair with ilira-stretch M4 mesh back in Fog, seat in Silvertex™ Champagne, and Polished Aluminum fixed arms and base.
