LAUNCH

CONFERENCE COLLECTION

Visual Impact

At over 20' in length without center supports, Launch is a stunning feat of engineering that creates a powerful centerpiece in any conference environment.

Powered Personal Space

With individual inset power and electrical/data boxes and a generous 27" of table area per person, Launch allows you to plug and play without bumping elbows. Launch can be ordered with power and data pre-installed or any NEMA approved components can be field installed.

Lighten Up

Inset LED lighting provides surface illumination for low lighting situations without cluttering the surface.

Everything You Need

A complete selection of coordinating media walls, storage units and supporting components are available to solve all of your conference needs.

Mix It Up

A wide range of finish and materials options allows the specifier to mix and match a multitude of combinations.

Coordinating items such as display cabinets, a mobile serving cart and a lectern enhance meeting areas.

Meeting Needs

Launch's media walls come in two sizes and utilize heavy gauge mounting brackets that retract for easy access and faster wire-up of TV's or monitors. Camera shelf is positioned for a natural viewing angle for meeting participants. Features storage areas for remotes, DVD's, satellite components, and other equipment.

Launch offers a full line of cabinets for additional storage and display. Cabinets can be specified under and/or surrounding media walls for large wall unit configurations.

Retractable monitor bracket for easy access
and faster wire-up.

Choose from an expansive surfaces palette.
Mix select veneers, solid surfaces,
granites and leathers.

Power and Data

Electrical/data boxes are located along the entire length of the table top for individual plug and play. Electrical/data boxes can house standard OFS components for power, voice, data, microphone, AV, USB and additional serial ports for printers, laptops and other equipment. Any NEMA approved components can be field installed to ease specification and installation.

Launch electrical/data boxes feature doors to hide receptacles and data ports for a professional appearance.
