Quotient™
Seating

WHERE FORM
AND FUNCTION ARE
PERFECTLY DIVIDED

Adaptable Form.

Finding a common denominator solution to satisfy a variety of needs and users can be challenging, especially with something as personal as a chair. As much as people love their task chair, today's workers are spending less time at their desks and more time collaborating and working throughout a space. This requires seating platforms to support a wider variety of body types and environments. With an ilira®-stretch mesh back for comfort, an advanced seat cushion design, and a stool option for standing-height worksurfaces, Quotient is much more than the sum of its parts.

COLLABORATIVE
Quotient is designed to help anyone quickly achieve their desired posture, making it ideal for collaborative areas in which workers gather for short periods of time throughout the day. Quotient stools accommodate the increasingly popular standing-height tables and worksurfaces found in teaming areas.

WORKSTATION
Quotient provides all the flexibility a space needs, but with the added benefit of all-day comfort. The ilira-stretch mesh back cradles the spine and the high-density foam seat cushion gives workstation warriors the comfort and support needed to stay productive throughout the day.

TWO OPTIONS. LIMITLESS USES.

With both a task chair and task stool option, Quotient is a perfect fit for areas with a variety of worksurface heights. Outfit workstations and conference areas with Quotient chairs, while adding stools to a café table or standing-height collaborative area.

ACCOMMODATING FUNCTION

Getting comfortable has never been as easy as it is with Quotient. The intuitive synchro-tilt control responds to the body's natural movements, allowing each user to quickly find their preferred posture and support. The high-density foam seat cushion is molded to support the body's natural curves. Quotient is the answer for bringing personal comfort to an entire organization.

ilira-stretch MESH BACK

The Black ilira-stretch mesh back is breathable and contours naturally to the user's body.

HEIGHT- AND WIDTH-ADJUSTABLE ARMS

Anyone can achieve the right upper body support by moving the arms up and down or in and out.

CONDENSED FOAM SEAT DESIGN

Achieve plush comfort in a thinner profile with Quotient's high-density molded foam seat cushion design. Engineered to mirror the body's natural contours, it reduces pressure points for all-day comfort. It also holds its shape longer than less dense materials, allowing it to continue to perform at a high level year after year.

SYNCHRO-TILT CONTROL

This advanced tilt control provides a more natural reclining motion and can be adjusted with easily accessible levers and a knob.

THE RIGHT ANSWER FOR TODAY AND TOMORROW.

Quotient is designed to support a variety of people and spaces for years to come. The seat cushion is made from a high-density molded foam that is engineered to outlast lighter foam materials. The durable five-star base and frame support up to 300 lbs., and the high-quality HON fabrics are stain-resistant and built to withstand daily wear and tear. From the casters to the top of the back, Quotient is covered by the comprehensive HON Full Lifetime Warranty, adding unparalleled confidence of ownership.
