Empower®

CONNECTING THE WAY PEOPLE WORK

SETTING THE BENCHMARK FOR SUCCESS

Everyone can use a little boost. That support to help you reach your full potential. That's where Empower benching comes in. It gives everyone the freedom to work their way — with more personal space, more adaptability and height-adjustability, integrated technology, and access to team members. Because when people feel empowered, incredible things happen.

Shown with Ignition® 2.0 seating and Contain® storage.

READY FOR A CLIMATE CHANGE

Change happens. So when you need to expand for a growing business, support mobile workers or accommodate additional needs, Empower responds by easily adapting to new team members and varying work styles. From straight line runs to 120° teaming pods, Empower paired with HON storage is the versatile benching solution that welcomes change. No matter which way the wind blows.

TAKE IT UP A NOTCH

Who says you can't be all things to all people? Empower's height-adjustable bases take benching to the next level whether you're early to rise or think that less is more. Half-rounds added to end of runs offer the versatility for quick powwows. Wire management routes power neatly below the worksurface— regardless of height— while giving easy access from above. The best of all worlds, and all in a day's work.

BUILT-IN SUPPORT SYSTEM

Just what you need, right where you need it. Wire management that transforms chaos into an afterthought. Screens that define personal space and add privacy without sacrificing openness. Convenient access to power and technology to support everything you need to charge. If only everything in life was this easy.

A. PRIVATE PRACTICE

For space division, add privacy screens in fabric, laminate, metal, or frosted glass.

B. END OF THE LINE

End of run panels divvy up space and create additional privacy.

C. A CALL TO ARMS

Add single or dual monitor arms to free up desk space and allow for optimal viewing.

D. UNDER NEW MANAGEMENT

Keep cords calm and collected from floor to wire trough with this innovative vertebra. Wire management chains tidy up height-adjustable applications.

E. POWER MOVE

Plug modules into the duplex located in the trough and attach them to the worksurface for easy access to power.

F. POWER PLAY

Take your pick. Power an entire benching configuration from the ceiling or the floor with wire management options to suit either.

G. DOWN TO THE WIRE

As the main electrical artery, power and data cables are laid into the trough.

EASY ON THE EYES

No matter what trending color is "the new black", this fresh selection of laminate and paint finishes lets you empower creative expression. And with multiple layouts to support the next generation of work styles, Empower keeps you working as smart as you look.
